SUPPLEMENTAL DECLARATION IN SUPPORT OF REISSUE APPLICATION

Supplementing my Declaration dated March 26, 1998, I,
Kenji Nishi, hereby make the following declaration:

1) I verily believe that I am the original, first, and
sole inventor of the invention described and claimed in
United States Letters Patent No. 5,477,304, and the
specification and claims of this reissue application,
including the claims presented by amendment therein.

2) I have reviewed and understand the contents of said
claims.

3) I verily believe said Letters Patent to be partly
inoperative by reason of my having claimed less than I had a
right to claim in said Letters Patent. For example, except
for original Claims 30-33, all of the original claims recite
an apparatus. Although Claims 30-33 recite a method, the
method steps include irradiating a mask, synchronously
scanning the mask and a plate, detecting a deviation between
an ideal positional relation and an actual positional

TECHNOLOGY CENTER 2800

relation of the mask and the plate at a term of a scanning exposure, and correcting a position of the mask. These recitations differ substantially from the steps of method claims now presented. For instance, Claim 68 recites the steps of moving a first object in a first direction, finely shifting the first object, and moving a second object in a second direction.

4) The failure to present in my original application, claims that are broader in certain respects than claims of said Letters Patent, as shown by the foregoing example, renders said Letters Patent partly inoperative and constitutes errors.

5) All errors being corrected in this reissue application up to the time of filing of this declaration arose without any deceptive intention on my part or on the part of Nikon Corporation, the Assignee of said Letters Patent.

The undersigned declares further that all statements made herein of his own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that

such willful false statements may jeopardize the validity of
the application or any patent issuing thereon.
